

Corporate Outlook E-mail & Data on the World's Most Popular Smartphones Secure, Wireless and Direct Synchronization with Microsoft Exchange 2003

When it comes to implementing a successful corporate mobility strategy, there are a few important factors to take into consideration - implementation, reliability, functionality, flexibility, and most importantly, Return on Investment (ROI). With RoadSync, all of these elements have been incorporated into the product design and pricing structure. Now corporations can save thousands by replacing laptops with mobile handsets, lowering costs typically associated with voice plans, as well as increase overall employee productivity around the office and on the go.

Please use our ROI Calculator to estimate the value of RoadSync for your corporation and then save it or print it to prove your point...

Assumptions:

- 1) Company cost of employing an employee is 200 % of average annual salary. This includes benefits, training, office facilities and IT provision. (On average, this works out to about 200% of annual salary.)
- 2.) Cost of data plan will in many cases may be offset by reduction in voice minutes: however no reduction in voice charges are assumed here.
- 3.) Assumes \$35 per month data plan.

Assumption Input

Cost of data plan per user per month

Total employment costs as % of salary

Select RoadSync Platform

Number of Users

Hours Worked in Average Workday

Daily Time Savings per User (%)
(Minutes Saved per Day)

Average Annual Salary (\$)

Total Cost Benefit to You

Cost of RoadSync Software

Cost of Data Plan with Network Provider

Total Costs including data plan

Return On Investment (ROI)
