

Secure, Wireless and Direct Push Synchronization with Microsoft® Exchange & Google Servers

“ With RoadSync we could follow our strategy to directly synchronize with our Exchange Server, without skipping a lot of PDA/smartphones that did not run the Windows Mobile platform. ”

Thomas Jean Penter
Chief Information Officer
Det Kongelige Teater, Denmark

Supports:

Why Choose RoadSync:

- Direct Connection to Exchange (No Middleware)

Product features vary based on platform, see back for details.

Microsoft
GOLD CERTIFIED
Partner

Using Microsoft® Exchange ActiveSync®, RoadSync provides secure, wireless and direct push synchronization of corporate e-mail, calendar, contacts, tasks & attachments - all in one affordable, scalable and easy to manage package. In addition to significantly enhancing end-user productivity, RoadSync simultaneously lowers IT costs by providing an easy to implement mobility strategy which eliminates the need for middleware servers and subscription fees. With RoadSync, you can now delete spam, reply to urgent messages, accept meetings, update contacts and conveniently access your critical data anytime, anywhere! Better yet, all changes made on the mobile handset will automatically sync with the Microsoft Exchange or Google Server and be up-to-date when you open Microsoft® Office Outlook® on your desktop or Gmail in your browser. As the first independent software vendor to license the Exchange ActiveSync protocol, DataViz is committed to extending this technology to reach the world's most popular smartphones and mobile handsets.
