**GOLD CERTIFIED**  
Partner

Whether you're an organization looking to mobilize your sales professionals or an individual looking to increase personal productivity, leaving your office or laptop behind does not have to mean leaving your crucial files and work behind. Documents To Go is a powerful word processing, spreadsheet, presentation, PDF and decompression application all in one complete package, designed to help you get your work done no matter where you are. Since it is full featured yet easy to use, Documents To Go is one mobile office suite that makes good business sense. To learn how you can work smarter, save time and be more productive by having your most important files with you at all times, **install a free 30-day trial of Documents To Go on your smartphone today!**

## Advantages for Individuals & Companies

### A Full Featured Solution

You have a full featured smartphone, why not have a full featured mobile office suite to help you get more done every day? Documents To Go is not just a viewer; it is a full editing solution designed to complement your desktop Office experience.

### Use & Edit Files with 100% Confidence

With DataViz' InTact Technology™, you can work on your files with complete confidence knowing that the original formatting of your documents won't be lost when they're edited on a smartphone and brought back to the desktop. After all, what good is a full featured solution without the ability to maintain document integrity?

### Supports Today's Most Popular File Formats

Word, Excel, PowerPoint and Adobe PDF are the world's standard file formats for businesses and individuals alike. Documents To Go brings these PC-native formats to your device so you can work with them when away from your desktop.

### Easy To Learn, Easy To Use

With Documents To Go, there's nothing new to learn. Access and edit files on your device the same way you would on your PC. It's that simple. If you're familiar with your desktop office suite, you'll have no problems working with your files using Documents To Go.

### Support for Today's Most Popular Mobile Devices

Documents To Go is available on five of the world's most popular platforms; Palm OS, Windows Mobile, Symbian OS-based UIQ, Symbian OS-based Series 80 and BlackBerry. Now your decision to have a true office suite is not hampered by the hardware you may have already invested in.

### Tried & Tested Solution

Documents To Go for Windows Mobile is Mobile2Market certified and Documents To Go for Symbian OS-based UIQ & Series 80 are both Symbian Signed applications, while Documents To Go for Palm OS is bundled on millions of devices from Palm, Inc. and others. In addition, DataViz stands behind the products we make by offering 24 hour web support with business-hour phone and e-mail support.

\* Supports Windows Mobile 5.0 Smartphone and 6.x Standard as well as Windows Mobile 5.0 for Pocket PC Phone Edition and 6.x Professional

## Key Product Features

### Use Native Microsoft Word, Excel & PowerPoint Files

Documents To Go can open Microsoft Word, Excel and PowerPoint files right on the mobile device, without any desktop conversion or synchronization needed. Whether you receive files via e-mail, Bluetooth or expansion card, native document support means you'll always be able to open a file when you're away from the office.

### View Native PDF Files on Your Palm OS and Windows Mobile Smartphone or PDA

PDFs are a mission-critical format that many businesses have a need to support. Now you can view native PDF files and attachments received through your e-mail application with ease. Featuring desktop-like viewing and support for embedded graphics, multiple zoom levels and more. You'll be able to do business no matter where you are.

### Zip/Unzip Files on Your Windows Mobile Smartphone

Now you can open attachments even if they've been compressed into a zip archive as well as "zip and send" an existing file for sending as an attachment. Documents To Go decompresses and compresses the files right on your device so you won't need to wait until you get back to the office.

### Unique InTact Technology™ Retains the Appearance and Content of Original Documents

The ability to maintain complex formatting and layouts of your original desktop documents after editing those files on a mobile device is crucial. All the hard work you've put into the formatting of your desktop documents shouldn't be compromised just because you needed to use them on your smartphone.

### Full E-mail and Attachment Integration with RoadSync and Other Wireless E-mail Solutions

Documents To Go combined with a wireless e-mail solution, such as RoadSync™, provides the most reliable solution for creating, editing and sending critical Office files. Now you can receive attachments on your device and work with them without having to wait until you return to the office.

## About InTact Technology™

InTact Technology is the first and only way to ensure that your original desktop documents retain all original formatting after those files have been edited on the smartphone and then brought back to the PC. Now you can have the confidence to know that your Office documents will not be compromised in any way just because you needed to use them on your smartphone. This is why Documents To Go is head & shoulders above any other handheld document solution on the market today! Download the InTact Technology white paper for more details.
