

The #1 Selling
File Conversion
Utility For The
Mac!

MacLinkPlus[®] 15 DELUXE

Don't Get Caught With
a File You Can't Open!

Don't get caught with a file you can't open!

Files are being sent to you every day from different people and in different ways. Sometimes they come on disks, attached to e-mails or are created in programs you just don't have. Problem is, you can't open them. MacLinkPlus Deluxe can help.

Translate virtually any file regardless of where it comes from.

TRANSLATE

View files or pictures even if you don't have the applications that created them.

VIEW

Create custom settings to automatically convert certain files.

SETTINGS

Having trouble opening a file? Just click on the Quick Tips icon to get additional information and tips on opening those files.

TIPS

Carry documents on your iPod:

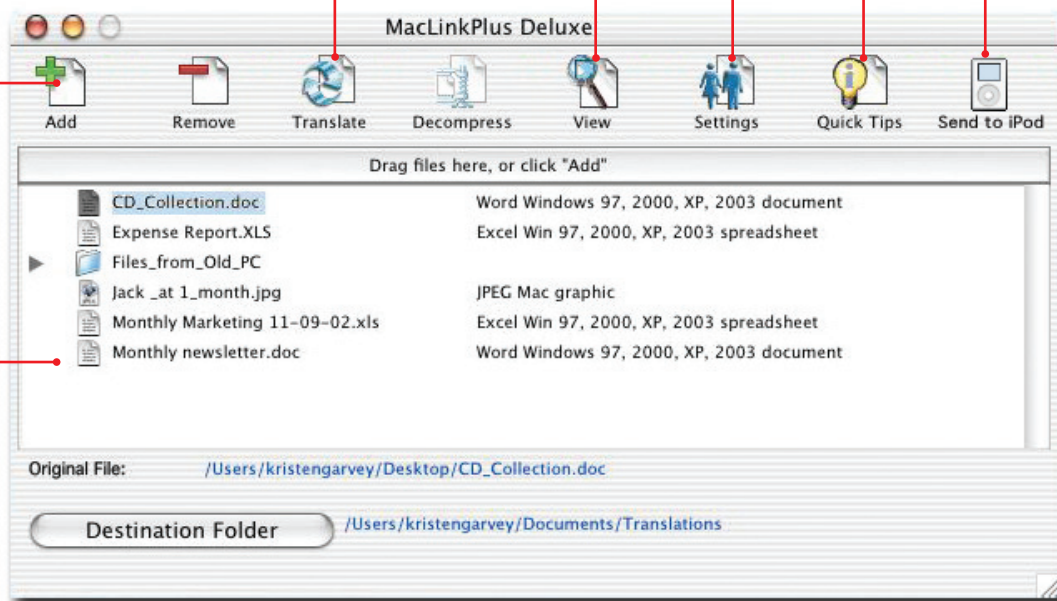

- grocery list
- directions
- "honey-do list"

iPod

Easy-to-use interface

lets you add files to translate and view.

Quickly and easily translate word processing, spreadsheet, database and graphic files.

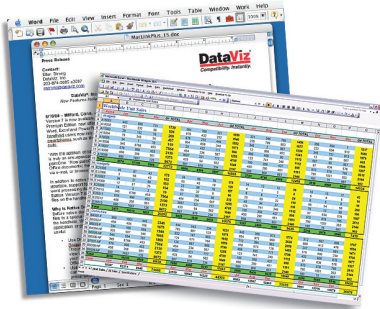

What can MacLinkPlus Deluxe 15 do for you?

MacLinkPlus Deluxe includes powerful new features and translators ensuring you have the tools you need to open files that come your way. Whether it is a picture of the grandchildren, a Word 2004 file, or even a Photoshop file, MacLinkPlus Deluxe continues to be your "One Stop Shop" for opening files.

New translators!

Be prepared to open files from the latest versions of Microsoft Word and Excel 2004, as well as WordPerfect 12.

Easily extract text from PDF files

It's never been easier to extract the text from contracts, newsletters, annual reports and other files saved as a PDF. Save yourself hours of retyping.

Now translate Photoshop and other graphic files

Now translating your pictures and graphics couldn't be easier, with the new and improved translators for Photoshop, BMP, JPEG, PICT, TIFF, and more.

Carry your documents on your iPod!

Now you can take your important info with you on your iPod.

- grocery list
- directions
- "honey-do" list
- and more

* works with iPod mini and iPod with Dock Connector

Open, view and print e-mail attachments

Decode and decompress e-mail attachments or files downloaded from the internet with ease using the latest version of MacLinkPlus. It now includes support for Stuffit X as well as traditional .zip formats.

See why over 10 million people have MacLinkPlus® Deluxe...

Convert virtually any file regardless of where it comes from

Whether the file is from Windows, the internet or an e-mail attachment, MacLinkPlus Deluxe will seamlessly help you open and use these documents. It's even perfect for doing batch conversions of your older Mac files into current programs such as Word and Excel.

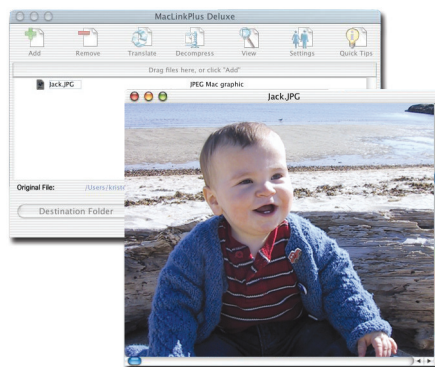

Convert files that were created in applications you don't have

MacLinkPlus Deluxe includes translators to convert files between different word processing, spreadsheet, database and graphic formats. You can actually open and edit documents in your programs just as if they were created there. Files retain their original formatting such as bold, italics and even embedded graphics.

Quickly view and print pictures

It's a great way to view pictures sent to you via e-mail. Even print them right from MacLinkPlus Deluxe.

Easily open unreadable e-mail attachments

MacLinkPlus Deluxe includes features to open compressed and encoded files such as .zip files. Even recognize and fix problem e-mail attachments.

30 Day Money Back Guarantee
