

Protect & Organize Your PINs, Passwords and More

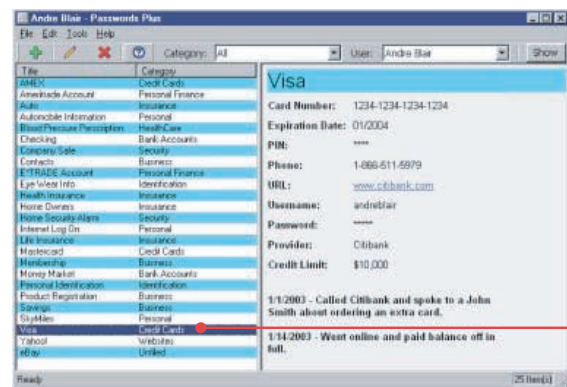

Keep your PINs, passwords, credit card numbers, bank accounts, frequent flyer info and more from falling into the wrong hands. It's the easiest way to store all your personal info in one place and bring it with you wherever you go!

FOR PCs, MACs & PDAs
Including Palm OS devices

Access Your Personal Information Anywhere, Anytime.

Passwords Plus includes software for your PC, Macintosh, handheld PDA and smartphone giving you the flexibility to access your personal info where and when you need it. The application for the handheld and smartphone includes the same 128 bit Blowfish encryption as the desktop, so your information is safe regardless of where it is stored. In addition, Passwords Plus synchronizes your PC, Macintosh and mobile devices, always ensuring your personal information is up-to-date. You can even synchronize with both your work and home computer.

Protect Your Confidential Info

Passwords Plus keeps your personal information truly safe and secure with industry standard 128 bit Blowfish encryption. It's never been easier or more convenient to protect and manage your personal data on your computer, handheld or smartphone. Now you can access all your private information with a single password.

Keep all your info in one convenient location

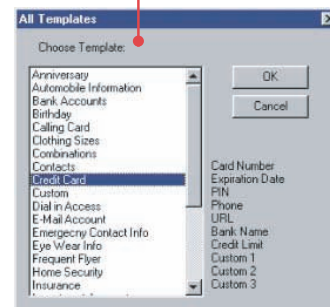

Organize all your info with easy to use templates

Store All Your Personal Information Safely & Securely in One Place

Tired of having your accounts, passwords and other personal information all over the place? Use one of the over 25 included templates and a vast number of categories to quickly and easily organize your information. Never again get frustrated by a misplaced account number or forgotten password.
